GOLDEN RULE

The times are rapidly changing. The computer we buy today might be a real dinosaur just two years from now. What's in style this week could be out-of-style the next. In order to be successful human beings, we have to learn to adapt to the constant change around us. However, some things never change...things like basic moral values and universally accepted codes of conduct. ...like the Golden Rule. You remember the Golden Rule:

Do unto others as you would have them do unto you.

This simple rule of human conduct has been around for thousands of years in most cultures on the planet. In his inaugural speech, former President Jimmy Carter said:

We must adjust to changing times and still hold to unchanging principles

So remember that it's OK to let go of the old in order to make room for the new, but some things are definitely worth hanging on to.
